

PROVIDER ALERT
Combination of Services Rules - Clarification
January 27, 2010

An MHA Combination of Services Rules clarification is posted on the ValueOptions® website (<http://maryland.valueoptions.com>, For Providers, Provider Information, Clinical/Utilization Management.)

The clarification states that medication management (CPT Code 90862) may be billed on the same day as outpatient therapy if the services are provided by two different clinicians.

If you have experienced same day/same client claims denials for one or both of these services, please resubmit the denied claims for reprocessing.
