

PROVIDER ALERT

Outcomes Measurement System (OMS) Provider Webinar

May 25, 2012

The Mental Hygiene Administration and ValueOptions Maryland® will be holding three webinars in the month of June to demonstrate the OMS Datamart. The OMS Datamart is designed to track how individuals receiving outpatient mental health treatment services in Maryland's Public Mental Health System (PMHS) are doing over time in various life domains, including housing, employment/school, psychiatric symptoms, functioning, substance use, legal system involvement, and general health.

The purpose of the webinars is twofold:

- 1) Providers will learn how to access and navigate the OMS Datamart.
- 2) Providers will be informed regarding the process that will be used to allow access to their own provider-level OMS data.

These webinars are scheduled as follows:

- Thursday, June 14th, 9:30-11:30
- Tuesday, June 19th, 1:00-3:00
- Wednesday, June 20th, 1:00-3:00

To register for the webinar session, access the appropriate site (listed below). You will then be prompted to enter registration information. A confirmation email with both the call-in number and the webinar instructions will be e-mailed to you after you have successfully registered.
