

PROVIDER ALERT

TARGETED CASE MANAGEMENT

OCTOBER 17, 2014

Effective October 1, 2014, as per notification from the Behavioral Health Administration, CMS has approved a State Plan Amendment that authorizes Maryland to offer new Targeted Case Management for children and youth with emotional disorders.

As of 10-1-14, a new billing code has been developed for providers to use for child and adolescent consumers served under this new program. Providers are to bill a T1017 for ages 1—18 (through 21 if the consumer started in case management before the age of 18).

Codes T1016 (daily case management), H0031 (case management assessment) and T1016 HW (transitional case management) are now to be used for adult services (age 18 and up).

ValueOptions has completed the update of our systems. We will be re-processing any claims that have been submitted with the T1017.
